

## **BREEDING CONTRACT**

### **Shipped Semen Addendum**

This addendum is part of the Breeding contract for the stallion “Kot N Kan D Dun Bueno” and the mare\_\_\_\_\_.

- 1. All parties agree that they have executed a breeding contract to breed the above named mare and stallion. In addition to the breeding contract, it is mutually agreed by all applicable parties that this addendum shall become part of the breeding contract mentioned above upon signatures of applicable parties.**
- 2. The Lewis Ranch Stallion Station shall ship semen collected from said stallion in an appropriate chilled semen container, sent by overnight courier, such as Federal Express, DHL, AirNet, etc. to the address of record provided in writing by the mare owner. Semen will be shipped immediately after collection. The Lewis Ranch Stallion Station certifies that the semen, when collected, will be of such a degree of motility and mobility so as to be reasonably acceptable for breeding.**
- 3. All breeding fees must be paid in full *prior* to the shipment of semen. Mare owner agrees to pay \$200 for chute fees and overnight shipping costs in addition to the stud fee agreed upon in the Breeding Contract. \*Shipping Counter to Counter will be an additional cost.**
- 4. It is mare owner’s responsibility to have a Veterinarian or certified breeding technician inseminate the mare, complete all forms required, and return the forms to any respective breeding registries. It is expected that the mare owner’s Veterinarian is aware of the mare’s current breeding status and can ensure that the mare is at the proper stage of ovulation to order semen and inseminate. Mare owner agrees that chilled semen requires special handling and that attempts to breed any mare outside the controlled conditions of an equine reproduction center can greatly reduce, and in some cases, prevent chances of conception.**

- 5. Mare owner certifies that only the mare listed on the Breeding Contract shall be inseminated by the shipped semen of said stallion without written consent from Stallion owner. \*NOTE: If semen is used on a mare other than as stated in this contract, mare owner shall owe a second full breeding fee to The Lewis Ranch Stallion Station.**
  
- 6. The Lewis Ranch Stallion Station will make every effort to provide semen as requested. Semen availability will be governed by shipping options and number of mares booked at any given time during the breeding season. The Lewis Ranch Stallion Station requests notification when mare first comes into her heat cycle and again by 6 pm on the day prior to shipment of semen or shipment cannot be guaranteed. In the instance that semen requests exceed supply, priority will be given to mares in order of booking dates. Note: Booking before January 1 earns a discount on the stud fee and booking multiple mares earns an additional discount.**
  
- 7. The mare owner agrees to comply with all APHA, AQHA or other breed association rules and regulations regarding the use of shipped semen and artificial insemination.**
  
- 8. The mare owner agrees to send the appropriate copies of the Insemination Certificate to the breed association and to The Lewis Ranch Stallion Station. Mare owner also agrees to return the shipping container within 7 days.**
  
- 9. All parties to this contract agree that the obligations of The Lewis Ranch Stallion Station shall be met when the shipped semen is packaged for shipment and pick up is arranged with one of the above reliable shipping companies (a pick up number is provided for the record), and subsequently accepted at the address of record provided by the mare owner. Acceptance shall be defined as the shipment container *arriving* at the address provided by the mare owner. The Lewis Ranch Stallion Station assumes no further responsibility for risk of loss once shipment of container has been arranged and documented.**
  
- 10. The Lewis Ranch Stallion Station is not responsible for lost, delayed or damaged semen or the shipping company and it's employees and makes no representation or warranties of any kind with respect to semen except that it is from the booked stallion and will be of such a degree of motility and mobility when shipped so as to be reasonably acceptable for breeding, will be packaged professionally, a reliable company arranged to pick up that package from a secure and safe location and that the stallion will have been tested for his cooling/shipping ability prior to shipping.**
